PROJECTS

TWITTER CLONE WEB APP

- Developed a comprehensive Twitter clone web app using React.js replicating core Twitter functionalities
- Implemented user authentication, including sign-up, login, and logout functionalities. Created tweet functionality allowing users to create, edit, delete, like, and retweet tweets.

CHAT WEB APPLICATION

- Developed a dynamic and user-friendly chat web app leveraging React.js for front-end development. The project included several core features to enhance user interaction and functionality. Create, Edit, and Delete Contacts, Send and Receive Messages and User Profile Customization.

BLOG APPLICATION

- FlutterBlog is a dynamic and engaging social media platform designed for bloggers and content creators to connect, share ideas, and inspire one another. Developed using Flutter, Google's UI toolkit for building natively compiled app for mobile, web, and desktop from a single codebase,

WEATHER APPLICATION

- Built with Flutter, this weather app seamlessly integrates a free REST API to deliver accurate weather updates, offering users a sleek and intuitive interface for quick weather checks on the go.

DYNAMIC E-COMMERCE UI

- The project aimed at replicating the immersive user experience of leading e-commerce platforms like Amazon. This project meticulously crafts a user interface using HTML, CSS & JavaScript to offer a seamless shopping journey.

AWARDS & ACHIVEMENTS

- I participated in the maths competition in school got 2nd place
- When I was in school I won third place in the 2019 district-level chess competition
